Biosketch of

Dr. Daniel W. Chan
<DChan@jhmi.edu>

  Daniel W. Chan, PhD, DABCC, FACB is Professor of Pathology, Oncology, Radiology, and Urology at the Johns Hopkins University School of Medicine, and the Director of the Clinical Chemistry Division and Co-Director of the Pathology Core Lab of the Johns Hopkins Hospital. Dr. Chan is also the Director of the Biomarker Discovery Center, Johns Hopkins University, in Baltimore, Maryland.

  Dr. Chan earned a B.A. degree in Biology at the University of Oregon, and his Ph.D. in Biochemistry at the State University of New York at Buffalo. He is a diplomat of the American Board of Clinical Chemistry, a fellow and former board member of the National Academy of Clinical Biochemistry.

  The focus of Dr. Chan's research is the development and application of proteomic and immunologic techniques in the diagnosis, management, and understanding of human diseases especially cancer. He is an internationally recognized expert in proteomics, tumor markers, immunoassay, and automation.   He has published over 200 articles and chapters, edited six books, and is a member of five scientific editorial boards.
