patterning and maintenance of axial structures

zebrafish epiboly promotes the aggregation and inheritance of damaged proteins during mitosis. (Bossuyt et al., 2013)

Ubiquitylation and activation of a Rab GTPase is essential for maintenance of epithelial integrity. (Lachance et al., 2010)

Lepage SE, Bruce AE (2014) Jan 1;127(Pt 1):111

Laver JD, Siddiqui NU, Westwood JT, Morris Q, Chen L, Dumelie JG, Li X, Cheng MH, Yang Z, Gonzalez. (Scott lab) and are terrific speakers.

Meneghini, Jonathan Rast and Rodrigo Fernandez (Tepass lab).

Molecules and Cell Biology, Program.

The Annual CPDB Retreat will be held at The Old Mill on Wednesday, June 4, 2014 - 2 pm.

The Keynote address will be given by an invited speaker. Please mark the dates in your calendar and plan to attend! Registration form is attached.

Congratulations to recent graduates. (McNeill et al., 2010; Borovina et al., 2013)

We are currently seeking speaker nominations for the 20th Anniversary celebration:

1. Former CPDB students, postdocs or faculty who are working in the area of Developmental Biology and are terrific speakers.

2. Lecturers who have given us workshops or seminars that we have found to be incredibly useful. Ko and Felix summarized everyone's comments and suggestions (anonymously) and forwarded them to us. We will bring these to the Steering Committee for discussion. I hope to be able to incorporate some of these suggestions for the 20th Anniversary Celebration.

Please send any suggestions for 20th Anniversary Celebration speakers to me at julie.brill@sickkids.ca.
