

Home and Community Care Highlights

A digest produced quarterly at the University of Toronto
by the CHSRF/CIHR Health Services Chair in
Health Care Settings and Canadians

Volume 8, Number 1: March 2009

In this issue:

- new model of primary care delivery;
- provided acute care at home reduces mortality and improves patient satisfaction;
- how to improve adherence to foot care guidelines for diabetics;
- a simple test can reveal mobility problems in the elderly;
- e-surveillance seen as enabling rather than intrusive;
- a decision aid for terminating resuscitation efforts for patients with out-of-hospital heart attack;
- Ontario is a leader in hypertension treatment and control.

Home and Community Care Highlights

Volume 8, Number 1: March 2009

Topic	Headlines & Conclusions (page no.)	Thumbnail Summary (page no.)
Medical Homes: Do we have what is needed to build this new model of primary care?	2	4
Hospital Admission Avoidance programs reduce mortality and increase patient satisfaction	2	5
Patient and practitioner partnership needed to implement clinical guidelines	2	6
Potentially reversible mobility limitations in the elderly revealed by endurance walking tests	2	7
E-surveillance: Big brother or “friendly eye in the sky?”	3	8
Making a difficult decision: resuscitation termination during an out-of-hospital heart attack	3	9
Ontario recognized as world leader in hypertension treatment and control	3	10

About *Home and Community Care Highlights*:

Home and Community Care Highlights responds to decision-makers' needs for timely and relevant evidence by providing accessible synopses of recent research pertaining to the financing, delivery, and organization of home and community-based health care activities.

This digest is produced quarterly at the University of Toronto by the CHSRF/CIHR Health Services Chair in Health Care Settings and Canadians and remains the property of the Chair.

The Chair is supported by the Canadian Health Services Research Foundation in partnership with the Canadian Institutes of Health Research, and by the regional co-sponsor, the Ontario Ministry of Health and Long Term Care.

Synopses are provided in two formats: **Headlines & Conclusions** crystallize the take-home messages of the research in a few sentences; **Thumbnail Summaries** condense the background, methods, findings, and conclusions of the research into quick-to-use, single-page overviews that include reference information.

Please see Page 11 for information on Review Team and list of Journals Reviewed.
