

Home and Community Care Highlights

A digest produced quarterly at the University of Toronto
by the CHSRF/CIHR Health Services Chair in
Health Care Settings and Canadians

Volume 8, Number 2: June, 2009

In this issue:

- Home- versus hospital-based pulmonary rehabilitation: different approaches, equivalent outcomes;
- Hip protectors: cost saving option for fall prevention in institutionalized elderly;
- Cost reduction through the use of informal care is not that simple;
- What do Canadians want in primary care?;
- Vancouver's controversial supervised drug injection site is cost-effective;
- Chronic stable angina has annual price tag of nearly \$20,000;
- E-pharmacist care management improves hypertension control;
- Weight Gain at Five Years of Age Contributes to Childhood Obesity

Hip protectors: cost saving option for fall prevention in institutionalized elderly	2	4
Cost reduction through the use of informal care is not that simple		5
What do Canadians want in primary care?	2	6
Vancouver's controversial supervised drug injection site is cost-effective	3	7
Chronic stable angina has annual price tag of nearly \$20,000	3	8
E-pharmacist care management improves hypertension control	3	9
Weight Gain at Five Years of Age Contributes to Childhood Obesity	3	10

About *Home and Community Care Highlights*:

Home and Community Care Highlights responds to decision-makers' needs for timely and relevant evidence by providing accessible synopses of recent research pertaining to the financing, delivery, and organization of home and community-based health care activities.

This digest is produced quarterly at the University of Toronto by the CHSRF/CIHR Health Services Chair in Health Care Settings and Canadians and remains the property of the Chair.

The Chair is supported by the Canadian Health Services Research Foundation in partnership with the Canadian Institutes of Health Research, and by the regional co-sponsor, the Ontario Ministry of Health and Long Term Care.

Synopses are provided in two formats: **Headlines & Conclusions** crystallize the take-home messages of the research in a few sentences; **Thumbnail Summaries** condense the background, methods, findings, and conclusions of the research into quick-to-use, single-page overviews that include reference information.

Please see Page 12 for information on Review Team and list of Journals Reviewed.
