

Home and Community Care Highlights

A digest produced quarterly at the University of Toronto
by the CHSRF/CIHR Health Services Chair in
Health Care Settings and Canadians

Volume 8, Number 4: December 2009

In this issue:

- effective education programs for kids with asthma;
- fall prevention strategies that are worth funding;
- new research on the potential of text messaging to increase medical adherence;
- factors that drive admission to long term care homes – and the strategies that could slow admissions;
- the relationship between dispensing of antipsychotics and the risk of death in long term care homes;
- the negative impacts of high-quality renovations on long term care residents when they are not consulted;
- the safety of planned home births with midwives;
- the information that should go from cardiac rehabilitation centres to primary care physicians to improve patients' outcomes.
