LLL Zoom Quick Start Guide

Later Life Learning is presenting the fall 2020 lectures virtually via Zoom webinars.

Registration eligibility:

The LLL lectures will be offered to active members AND waiting list members. Everyone will be sent an email advising when registration is open. The email will also contain a link to the LLL website Programs page. To find the webinar lecture link, go to that page; each link will be contained at the top of the Series description.

When you click on the lecture webinar link to register you will be required to complete the registration form and then pay using PayPal – this does not mean you need a PayPal account, you may pay by credit card – just select the option that is below the PayPal login box.

Note: When completing the registration and payment forms, please make sure you enter your email address correctly so that you receive the emails that will be automatically sent to you as a registrant.

After you have registered you will receive an emailed Webinar Registration Approval and after you have paid you will be sent from PayPal, a payment confirmation email. These are the only confirmation emails you will receive.

Now you’re all set – one day before the lecture as well as one hour before the lecture, you will be sent a reminder email.

Using Zoom as a Webinar participant

All LLL lectures will be provided through Zoom webinars – your camera will not be used, your picture will not be seen by other participants and the only way to communicate with the host/instructor will be by typing in Q & A option.

There are several Zoom features that you can adjust; you can explore these settings and controls to improve the quality of your webinars. For help in this regard please check out Tech Serve TO – see last page.

Should the reception of the video fail during the lecture, it could be caused by the bandwidth download speed of your connection. If more than one device is using your network at the same time, this could slow the reception and cause interruptions.

Devices
For LLL virtual lectures and webinars we suggest you use a tablet, laptop or desktop computer. Your mobile phone screen may not be large enough to do justice to the presentation.

Please make sure your browser is up-to-date. Out of date browsers may affect the way Zoom runs.

LLL Zoom webinars

All you need to do to join the webinar is click on the link contained in the reminder notice and provide the password for that lecture. If you are required to sign in, use the name and email address that you used to register. You do not need a Zoom account to attend a webinar.

Please do not share the link with others, it can be used by only ONE person/device. (If you share it with a friend and they join the webinar before you, you will not be able to join).

A note about security

LLL knows that there have been privacy and security concerns regarding Zoom and is aware that Zoom has been and is addressing those concerns. The latest version of Zoom now offers settings that reduce risk, and those settings have been implemented for LLL webinars and meetings to ensure the least exposure to members.
