We're almost there!

Only a very few forms are still needed
in order to complete the data set:

Entry	5
Labour & Delivery	6
Neonatal	7
Maternal Complications	7

We expect them momentarily.

The final analysis gets under way this week.
Our thanks again to everyone for getting their data
booklets in and responding to our queries so
promptly.

Collaborators' Meeting Toronto, September 8-10, 2000

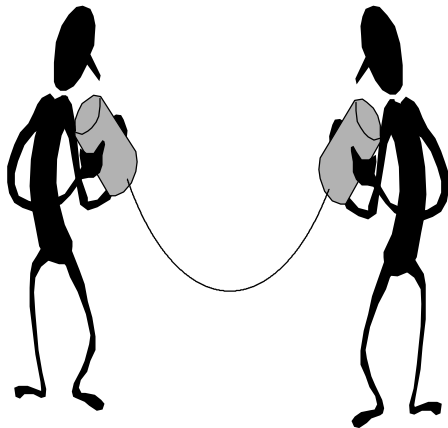

To date we have confirmation from 83 people
who plan to attend. Please fax us your
attendance form if we haven't heard from you.
We look forward to seeing you!

Details of hotel and meal requirements, social events and presentations should reach us by August 1.

The 2 Year Follow-up continues...

Remember that this important part of the TBT is still ongoing. For those who may just be starting this phase of the study, we provide the following notes:

- maintain regular contact with TBT patients so that they can complete the 2 Year questionnaires. We provide postcards and reminder notices for this purpose – if you need more supplies please ask us.
- contact the mother at approximately 23 months and mail the questionnaires or arrange an interview. We provide you with monthly reminder notices as required. **Remember that the 24 Month ASQ must be completed within a 23-25 month period after delivery.** It is not valid outside this “window”.
- when the questionnaires are returned to you, **score the ASQ. If the score on any page is below the cut-off, then arrange a neurodevelopmental assessment.** The *24 Month Infant Neurodevelopment Form* is used to record this assessment.
- mail the completed questionnaires and forms to the Data Coordinating Centre.
- if for some reason it has not been possible to contact the family and complete the *24 Month ASQ* at the correct time, let us know and we will send you the *30 Month* version for completion at 29-31 months.

See you soon.
