fax: 1 416 351 8131 email: sheila.hewson@utoronto.ca website: www.utoronto.ca/breech

The TBT database is closed

and the final analysis is almost complete. Once we have had a chance to discuss the final results at the Collaborators' Meeting, we plan to submit a full report to *The Lancet* shortly thereafter.

We now have more than 140 people signed up to attend the Collaborators' Meeting in Toronto, September 8-10, 2000.

TORONTO,
11 SEPTEMBER

Final confirmations have been sent to those attending.

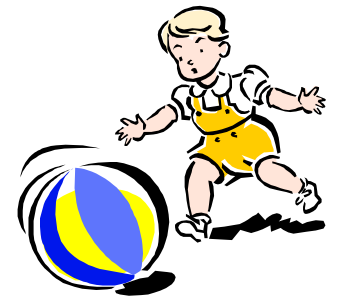

3 Month Follow-up

This important component of the Term Breech Trial is drawing to a close, as the last randomised baby is now 3 months old. If you have any 3 Month Postpartum Questionnaires outstanding, please send them to us right away or let us know their status.

2 Year Follow-up

Thank you to those who are working hard to keep track of these mothers and babies, and to send us the ASQ and 2 Year Maternal Postpartum Questionnaires. It is not necessary to send these by fax although we do appreciate getting them so quickly from some of you. They can be returned to us by airmail if you wish. (Don't forget to calculate the ASQ score, to be sure that a neurodevelopmental assessment is not required.)

The next newsletter will be issued on October 1, 2000
