OVERALL TOTAL: 715 TOTAL FOR THIS MONTH: 31

Happy New Year from all of us at EECV2!

All of our recruiting Centres have made 2006 an outstanding year for the Trial. Our recruitment has been excellent, and we had two very successful collaborators' meetings in South America. We achieved our first milestone in July by recruiting the 500th woman into the study so we could conduct our first interim analysis and we are very close to achieving 50% of the total recruits needed for the Trial. We thank you all for your commitment to answering the question of best timing of ECV and wish you and yours all the best for the New Year! We hope that we can count on your continued support of the EECV2 Trial in

Welcome to EECV2!

This month one more centre has joined us! We now have 63 collaborating centres! A very warm welcome goes out to:

• Dr Renato Natale and Ms Marlene Watson, St Joseph's Health Centre, London, CANADA

Quote of the Month Recruitment The person who makes a success of living (planned enrolment of 1460) is the one who sees his goal steadily and as of December 31, 2006 aims for it unswervingly. That is dedication. Jan -Jul -Jan -Jul -~Cecil B. DeMille Dec Jun Dec Jun Sept Oct Nov Dec Annual Goal COUNTRY AUSTRALIA CHILE CANADA THE NETHERLANDS ISRAEL IRELAND ARGENTINA

Data collection for women who decline the ECV procedure after randomisation:

As with any ethically managed study, a woman recruited to the Early ECV2 Trial can choose to decline to participate at any point in the trial. However, if a woman declines to have an ECV procedure, it does not necessarily mean she is refusing to participate in the study. She may still be willing to allow you access to her medical records so that a complete data set can be obtained. Unless access to the information is refused, data for all women randomised should be collected regardless of whether a procedure is done. The data for all women is important, as the analysis will use an intention to treat approach. If a woman who has been randomised declines the ECV procedure, please ask her if you may still retrieve the data from her medical records. If she is willing, explain to her that we would be interested in her views about being part of the study as well, so if she is willing to complete a study questionnaire following her birth we would be very appreciative. Let her know that her feedback will be very important!

Recruitment Recognition -December Quarterly Draw!

•

•••••

The success of the EECV2 Trial depends on your recruitment efforts. In order to recognise your work in recruiting for the trial, we are continuing our quarterly draw for a small token of recognition. Every time your centre recruits a woman into the EECV2 Trial, your centre is entered into the draw. For this quarter we would like to congratulate Prof Kassam Mahomed at Ipswich Hospital, Ipswich, Australia! Our next winner will be selected in the March quarterly draw!

Patient Recruitment

As of January 2, 2007 we will be sending a daily EECV2 recruitment update! We have been sharing this information among MIRU staff and the Principal Investigator every day and

thought that you would be excited to receive these updates as well! Watch for your centre's name to appear as you recruit. If you are not receiving these e-mails and would like to, please let us know at $\underline{\text{eecv2}(a)\text{sw.ca}}$.
