Happy New Year from all of us at EECV2!

All of our recruiting centres have made 2007 an exceptional year for the EECV2 Trial. Our recruitment has been excellent, and we have had some record high months. The visits with our Australian centres were very successful as were the Canadian teleconferences that were held this year. We achieved another milestone in May by recruiting the 900th woman into the study so we could conduct our second interim analysis. Finally, we are very close to achieving the full sample needed for the trial and look forward to making that goal as soon as possible in 2008. We thank you all for your commitment to answering the question of best timing of ECV and wish you and yours all the best for the New Year!

We hope that we can count on your continued support of the EECV2 Trial as we race to the finish in 2008.

Recruitment Recognition – December Quarterly Draw!

Your recruitment efforts are imperative to the success of the EECV2 Trial. As you know, in order to recognise your work in recruiting for the trial we planned a quarterly draw for a small token of recognition. Every time your centre recruits a woman into the EECV2 Trial, your centre is entered into the draw. The more your centre recruits the greater your chance of getting the quarterly prize!

For this quarter we would like to congratulate Dr Lone Hvidman and Jordemoder Inger Marie Mogensen, Aarhus University Hospital, *Aarhus*, DENMARK! Watch out for our next winner in the March newsletter!

Recruitment Tip:

During a recent teleconference of our Canadian collaborators we heard that some women who are approached to participate in the EECV2 Trial think that ECV itself is an experimental procedure. If this is happening at your centre, it may be helpful to point out that ECV is considered to be the standard of practice. For example, the National Health Service in the United Kingdom has ECV listed as the first item under "reducing likelihood of Caesarean section". Providing access to the National Institute for Excellence (NICE) Guidelines for Caesarean Section which highlights this information about ECV could be offered to all women who are eligible for the trial. The ECV information is on page 2 of the guideline and summarised on the chart on page 4. The NICE guideline can be found at:
