Getting your first recruit - Strategies from South America

At the EECV2 Collaborators' Meetings in Santiago & Buenos Aires five centres gave excellent presentations regarding recruitment strategies! We have decided to include some of these ideas here - this is the first installment from our Santiago meeting. We hope that the strategies will be useful to all centres for recruitment! Dr Jorge Carrillo at the Padre Hurtado Hospital, *Santiago*, shared the following tips for getting your first recruit:

- Make referrals easy i.e. keep specific clinical hours where primary care midwives or physicians can phone in to make an appointment with the EECV2 clinicians
- To keep the trial on the fore of everyone's mind remind doctors, nurses and midwives about the study at shift changes; share the results of referrals with your team
- Update your team with progress of the trial
- Provide opportunities for feedback at monthly meetings & training sessions
- When approaching women about the study, apart from the patient information sheet, talk to women on a personal level and include partners or close relatives in the discussion.

The Spanish version of the EECV2 protocol is now available in our webpage!

We're almost at 500!!!

We have very nearly recruited the 500th woman into the EECV2 Trial. Who will recruit our 500th woman to the Trial? We will send the centre who recruits the 500th woman a certificate to acknowledge their

contribution to reaching this important milestone!
