We need to reach 100% Before We Can Begin The Primary Analysis!

94% of all the Primary Data has been returned
92% of the returned data is 'clean' with no outstanding queries

The data campaign is moving along very well but we're still not at 100%. In the next few newsletters we plan to congratulate all of our centres who have obtained 100% completed data and queries. The first list of centres can be found on the last page - congratulations to all who have reached this goal! We look forward to adding new centres to the list next month and having all centres on the list before December 31st, 2008.

When you turn the page, you will find a table that lists all of our centres with the percentage of complete (have all data forms returned) and clean (have all queries resolved) data. We appreciate that women recruited near the end of the study, may have just recently given birth, and that their data forms are not overdue! For those cases, and for any overdue cases, please keep up the great work of completing the data forms and mailing them in as soon as possible. Keep up the hard work and join our list of centres with 100% returned and complete data!

EECV2 Primary Data Report

(Entry, Procedure, ECVQ, Labour & Birth, Maternal, Neonatal, MSQ Forms)

Country	Centre	# Patients	# Cases with all forms returned	# Cases with all queries resolved
