MACS-5 Follow-up Has Begun!!

FIRST MACS-5 FOLLOW-UPS COMPLETED

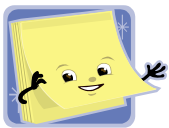

We are excited to report that the first 5 follow-ups have been completed!

As you continue to prepare for the start of MACS-5 at your site, we encourage you to keep in contact with families so that it is easier to complete the assessments when the time comes.

MACS-5 CLINICAL STUDY AGREEMENT

One of the important components of starting this study is the clinical study agreement. Please be sure to complete the agreement between Sunnybrook Health Sciences Centre and your institution. Agreements have been and will continue to be distributed to sites with patients due for the MACS-5 follow-up.

THANK-YOU TO OUR COLLABORATORS IN POLAND & HUNGARY

In September 2006, we had the opportunity to meet with our collaborators in Warsaw and also in Debrecen, Hungary. We appreciate the time we spent with discussing the MACS 2 Year follow-up and strategies of organizing MACS-5 in Hungary & Poland.
