FUNDING RECEIVED!

We have been notified by the Canadian Institutes of Health Research (CIHR) that the Twin Birth Study has been approved, with a very high rating of 4.49. Our thanks to everyone who helped so much by showing such enthusiasm for the project and providing letters of support.

There is now lots of work to be done here at the Data Coordinating Centre and we will keep you informed of our progress. At the moment, it is our goal to open the trial for recruitment later this year.

We hope to send you a final version of the protocol within the next couple of months so that you can begin the process of local REB/IRB approval.

Once again, our thanks to everyone and ...

Welcome to TBS!

We look forward to working with you.
